SINGLE SEMESTER IE PROJECT – IMPORTANT INFORMATION

PLEASE READ THIS INFORMATION IF YOU ARE INTERESTED IN
UNDERTAKING IE AS A SINGLE SEMESTER VERSION IN 2006

Students are allowed to do the IE project (FIT3015) in one semester ONLY if all they have to do to complete the degree is the IE project plus no more than one elective. All enrolments in IE must be done manually. If you wish to enrol in FIT3015 for semester 1, we will have to see that you have no more than one elective to go with it before we can sign the form. This means that, if it depends on units you have done this semester, we will have to wait until the semester 2 results are out. Please bring your manual enrolment form to be signed after that.

If it depends on your doing some summer semester units, we will not be able to sign the form until the results for summer semester are released. You should go to the FIT3015 seminar in week 1, and tell the coordinator that you are waiting for summer semester results. When they are released, you can enrol in FIT3015. You should also email Jason.Ceddia@infotech.monash.edu.au NOW to tell him that you are planning to do FIT3015 in semester 1, so that we know how many to expect.

If you are an international student, you should enrol in two third year units instead now, so that you are not underloaded. Then, when your results show that you do have the requirements for FIT3015, we will sign the form and you can change your enrolment.
