Group Analysis and Design Project
Semester 1, 2006

Peer Assessment Sheet

Name: Student ID: Group Name: Assessment of Group:

For each member of the group, you have five (5) marks to allocate. For example if there were three (3) other students in your group, you would have to allocate 15 (3 x 5) marks between the three of them; if there were four (4) other students in the group, you have 20 (4 x 5) marks to allocate between them.

A mark of 5 indicates that you think that your fellow group member has made a fair and reasonable contribution to the project. Marks greater than 5 indicate the person did more than a fair share of the project, less than 5 indicate that you thought the person did less than their share of the work.

A person's mark will change by at most 20% as a result of the average of their peer assessment.

	Name	Marks Allocated
1		
2		
3		
4		

I believe this to be a fair and reasonable assessment of the members of my group.
